

INDUSTRIAL AUTOMATION

- ▶ The needs of the industrial automation sector in terms of improved performance, noise reduction and maintenance costs are met using of plastics for the manufacture of gear, wheel, pulleys and mechanical parts.
These materials replace more traditional metal products, improving performance, reducing noise and maintenance costs.

▶ **PP • PA6G+OIL • PA6G+MOS2 • POM • PE • PEEK**

▶ APPLICATIONS

GEARS, PULLEYS, ROCKS, BEARINGS, STRUCTURAL COMPONENTS

▶ ADVANTAGES

WEIGHT REDUCTION
NOISE REDUCTION
IMPROVEMENT OF THE EFFICIENCY
HIGH WEAR RESISTANCE
HIGH SLIDING PROPERTIES
