

- The requirements of the aerospace sector in terms of safety and improved performance are met with the use of mechanical parts such as flanges, supports, slides and casings, made of high performance materials such as PEEK, PEI, PPS, etc., which, thanks to their technical qualities, low weight and high mechanical resistance, meet the complex demands of the sector.

► **PET • POM • PMMA • PA • PC • PEEK • PEI • PE • PPS • PSU • PTFE • PVC**

► APPLICATIONS

FLANGES, SUPPORTS, CARTER, BEARINGS, GEARS, STRUCTURAL COMPONENTS.

► ADVANTAGES

WEIGHT REDUCTION
HIGH MECHANICAL STABILITY
TRANSPARENCY TO ELECTROMAGNETIC
HIGH TEMPERATURE RESISTANCE
REDUCTION OF THE MAINTENANCE COSTS
LOW TOXICITY
