

- ▶ The automotive sector's requirements in terms of light weight, self-lubrication, wear resistance and diversification in use are met using plastics that can be adopted in multiple production areas ranging from production lines to assembly lines.

▶ **POM • PMMA • PA • PA6+MoS2 • PA6G+oil • PC • PE • PET • PP**

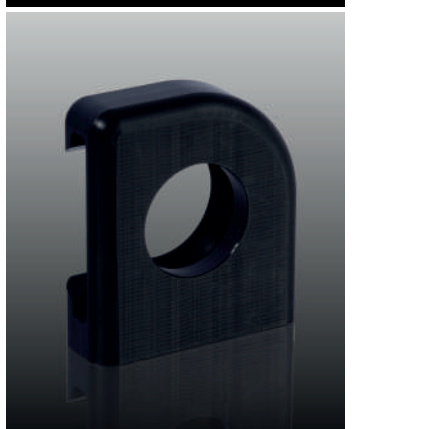

▶ APPLICATIONS

SLIDES SKIDS, BUMPERS, GEARS, WHEELS, BUSHINGS

▶ ADVANTAGES

WEIGHT REDUCTION
RESISTANCE TO CORROSION, ABRASION AND WEAR
HIGH SLIDING PROPERTIES
REDUCTION OF THE MAINTENANCE COSTS
TENSILE STRENGTH
