

- ▶ The request of the paper industry in terms of noise reduction and resistance to chemicals are met using techno polymers that have better characteristics than metal in terms of reliability and performance. Tecno Plastic Engineering specialises in the manufacture of PE guides, PTFE rings and PA6.6+FV gears that are often used in paper and cardboard production plants.

▶ PET • PE • PTFE • PA6.6+FV • PA6G • POM • PC

▶ APPLICATIONS

GEARS, RINGS, GUIDES, ROLLERS, STRUCTURAL COMPONENTS

▶ ADVANTAGES

- WEIGHT REDUCTION
- HIGH TEMPERATURE RESISTANCE
- HIGH WEAR RESISTANCE
- HIGH MECHANICAL PROPERTIES
- REDUCTION OF THE MAINTENANCE COSTS
