

AGRICULTURAL AND CONSTRUCTION

- The demands of the agricultural and construction sector in terms of strength, lightness and durability are met with the use of pulleys, bushings and runners, made of extremely strong and lightweight techno polymers that help reduce noise and weight, improving the performance and durability of equipment. They can also be used in harsh conditions, thus reducing maintenance costs. Tecno Plastic Engineering specialises in the manufacture of cast PA6, or MoS2/OIL additive, components used in various parts of lifting equipment, performing important functions reliably and safely.

► **PP • POM • PMMA • PA6 • PA6G • PA6+MoS2 • PA6+oil • PC • PEEK • PPS PP • PVC • PE**

► APPLICATIONS

PULLEYS, BUSHINGS, SKIDS, ROLLERS, SPACERS, CLAMPS

► ADVANTAGES

- EXCELLENT MECHANICAL PERFORMANCE
- REDUCTION OF THE MAINTENANCE COSTS
- WEIGHT REDUCTION
- HIGH SLIDING PROPERTIES
- HIGH WEAR RESISTANCE
- LOW THERMAL CONDUCTIVITY
- RESISTANT TO ENVIRONMENT AND ATMOSPHERIC AGENTS
